Good Contemporary Decoration is Simple...but not Stark!

Today's trend in interior decoration requires more interest on the walls . . . not the picture-cluttered walls of the Victorian era . . . but backgrounds with *far more imagination* than the plain drab wall. Wonderful textures are available which add character to your walls . . . and on these textures are overprinted scenic wallpaper designs which may be placed exactly where they will provide the most *dramatic setting* for the smartest arrangement of furniture with the same texture being used on the balance of the wall space.

Country Garden ABOVE:

As you look across this friendly room . . . the wall seems to "open" through shuttered doors into a beautiful garden. While this tends to make the room look larger . . . the dimensional boundaries are still defined by the realistic wall of shutters. This is Van Luit's popular "COUNTRY GARDEN" . . . a design of great versatility. The set is composed of 4 strips covering 9 lineal feet when hung in sequence. In a choice of inspiring colorways.

You can do Wonderful Things with Scenic Wallpaper

With the versatile wallpaper designs of Van Luit . . . you can add interest and give a room a whole new personality. You can make rooms look larger by using scenics which give the illusion of space and distance . . . you can minimize objectionable architectural faults with unusual overall textures.

From the harmonious colors you can establish a smart scheme for the entire room. You can direct interest to one focal point . . . but best of all you can create a background with character and individuality for your furnishings . . . whether they are traditional, modern or a combination of both.

Coromandel BELOW:

It's difficult to realize that the fascinating folding screen on the wall above the bed is, in reality, a sectional scenic wallpaper. It is a beautifully drawn reproduction of one of the old Oriental Coromandel screens which have become such an important accessory in today's interior decoration. COROMANDEL is available in rich metallic colors in a 4 strip scenic covering 9 lineal ft.

Jardinet ABOVE:

... a 4 panel scenic, each design panel complete in itself and printed on interesting textured backgrounds, permitting any one of the designs to be "spotted" wherever desired and matching background paper used on remaining areas. The design is faintly oriental in flavor ... bamboo and persimmon trees lightly drawn and vertical in feeling. Notice in the picture how a part of the design used at the end of the long hall ties the two rooms together with the same decorative motif for a smart correlated effect.

Marshes ABOVE:

... an exquisite 4 panel scenic with that quality of coloring and technique so characteristic of rare, antique wall hangings. Use it as a dramatic background for either contemporary or traditional furnishings ... its elegant simplicity is a delightful departure from the usual. The set consists of 4 panels and 3 rolls of the textured background. Each panel, complete in itself, can be placed where most needed and the balance of wall space covered with the textured background.

Spring Bough & Shoji

... is a beautifully-drawn, gay blossoms. It emerges from a depth of 38" leaving ample design for the most advanced furniture. The SHOJI wall is, in reality, wall paper. It may be used alone or with the "Spring Bough" room a delightful Oriental room. The BOUGH is composed of 4 panels of textured grounds which are rolled to complete any amount of wall space you may desire. SHOJI is available in many designs.

Grand Manor RIGHT:

... a floral garden scene. It is today's return to greater elegance. Because of thoughtful design, the panels necessarily run consecutively in order, but may be placed where they will be best. It consists of 5 panels covering 17 lineal feet. Three rolls of plain texture are available.

Pine Ridge BELOW:

... this happy little rural scene. It is the days of your grandma and husking bees. But a modern touch pervades this particular country scene. Like, one-dimensional technique. It is up to the era of black wrought iron furniture. PINE RIDGE consists of 3 panels covering 9 lineal feet.

Backgrounds for Living

As you examine these inspiring pictures ... imagine how lovely a Van Luit wall-paper mural would look in your home. Visualize how much more interesting a room becomes when the walls are an integral part of the whole decorating idea. Van Luit scenics are so beautifully colored and in such a wide variety of subjects ... you're sure to find the exact one that will inspire you to create a more beautiful room and therefore a more pleasant background for living.

Sectional Scenic Wallpapers

are, in reality, *handprinted murals* which have been divided into 30" strips. When joined together they make the complete design which covers from 9 to 18 lineal feet of wall space *without repeating* (depending on the number of strips in the set). You may start with *any* strip, permitting the most important elements of the design to be placed where they will be *best* in your room. Remember, scenic wallpaper has wonderful decorative possibilities. Your dealer or decorator will be pleased to assist you.

For the New...or not so New

If you're lucky enough to be planning the decoration of a new home . . . you'll find that **no other** single element of interior decoration will **add so much** decorative beauty as a sectional wallpaper mural. If you're doing over an old room . . . you can change the complete character with a scenic . . . **even though** you retain all the furniture and accessories which you now have. The use of a sectional scenic will act as a dramatic back-drop and make your whole room take on the new beauty of an exciting stage setting.

Decorative Versatility

Many of these delightful designs are printed on exclusive Van Luit textured grounds. These grounds come in a variety of fascinating textures simulating rare oriental silks, grass cloths, rice papers, fabrics and others. By using the sectional mural on one wall of a room . . . the correlated effect may be carried on the other three walls, halls, alcoves and adjoining rooms by using the matching texture. By doing this you create a unity of design and color which spells "simplicity," the keynote of the best contemporary decorating.
